

CLAIMS

What is claimed and desired to be secured by the United States letter patent is:

1. A stretchable apparatus comprising of:

an elasticized tube open at both ends configured to have a stretch of at least twice its original length.

an elasticized tube open at both ends configured to have a stretch of at least twice its original diameter.

an elastic sleeve with a tight fitting configuration around an appendage, extremity or thorax.

an elastic sleeve with skintight fitment that compresses the appendages, neck or thorax throughout its length and circumference to prevent the loss of bodily fluids.

2. Elastic bands of same material that circumvent the stretchable apparatus claim 1.

3. The elastic bands of claim 2 wherein they are equal to the circumference of stretchable apparatus claim 1.

4. The elastic bands claim 2 wherein they are separated from each other equidistant along the entire length of elastic apparatus claim 1.

5. The elastic apparatus of claim 1 wherein the elastic is comprised of **latex**.

6. The elastic apparatus of claim 1 wherein the elastic is comprised of **silicone**.

7. The elastic apparatus of claim 1 wherein the elastic is comprised of **plastic and plastic derivatives**.

8. The elastic apparatus of claim 1 wherein the elastic is comprised of **latex, silicone, plastic, plastic derivatives singularly and in any combination of each other**.

9. The elastic apparatus of claim 1 wherein the elastic is comprised of **epidermal tissue**.
